

After he was taken to the Municipal Court, where he was arraigned, charged with the larceny of \$5,832 from the company which he had just left.

Abbott, in a statement to a reporter of the BOSTON HERALD, said he was guiltless of any crime, and that he had been induced by persons in the company higher up than himself to leave the city.

"I was told," he said, "that the manager, said Abbott, "Others higher up than I will catch it when I go into court, I

Dupe of Others, Abbott Says.

Inspector Wolf, in speaking about the case, said:

"Abbott passed freely to me about the case. He seemed perfectly willing to accompany me to the station, although I had extruded him from the city, and I had told others in the company and declared he was a dupe of others. He said he did not know perfectly well he was going to leave the city, and he had the names of persons who had been in the company."

"Abbott said he did not get any of the names that was made, and that the others got it."

POOR NOAH

Would Have Dispelled MONOTONY IN THE ARK IF HE HAD TO SOLVE WEIGHT OF BRICK

W^EATHERMAN, forbear! Ruth, in due proportion, is a necessity, even to brick masons. But we want Noah's brick, forty-four-and-a-half-pounders. By the way, what a great thing it would have been for the family in the ark if they had the following problem to solve:

IF A BRICK WEIGHS SEVEN POUNDS AND A HALF A BRICK, HOW MUCH DOES A BRICK AND A HALF WEIGH?

There would be no such thing as monotony while waiting for Ararat and safety.

Take the hint. Break the monotony in your own life by tackling the puzzle. Then send your solution to the Puzzle Editor, BOSTON AMERICAN.

Here are a few other solvers:

Echo From Worcester:
Puzzle Editor: The puzzle is too simple for me. I will send you a brick and a half.

"Sure Thing," He Says:
Puzzle Editor: I will send you a brick and a half.

Their Answer is 21 Pounds:
A brick and a half weigh 21 pounds. If the brick weighs seven pounds and a half, the half brick weighs three pounds and a quarter. Seven and three and a quarter make ten and a quarter. Ten and a quarter is the answer.

Think the Brick Light:
The puzzle is too simple for me. I will send you a brick and a half.

Says it is 11 1/2 Pounds:
The puzzle is too simple for me. I will send you a brick and a half.

Dodges the Issue:
The puzzle is too simple for me. I will send you a brick and a half.

Fourteen, Says P. K.:
The puzzle is too simple for me. I will send you a brick and a half.

Seven Pounds, Two Half Bricks:
The puzzle is too simple for me. I will send you a brick and a half.

Weights a Brick and a Half:
The puzzle is too simple for me. I will send you a brick and a half.

22 1/2 Pounds, Their Guess:
The puzzle is too simple for me. I will send you a brick and a half.

Malone's Brick is Heavy:
The puzzle is too simple for me. I will send you a brick and a half.

His Guess is 10 1/2:
The puzzle is too simple for me. I will send you a brick and a half.

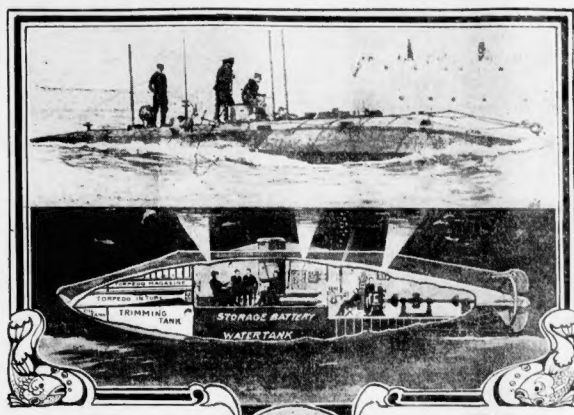

They Are Homologous Bricks:
The puzzle is too simple for me. I will send you a brick and a half.

Seven Pounds, Half a Brick:
The puzzle is too simple for me. I will send you a brick and a half.

Answer in Pounds and Bricks:
The puzzle is too simple for me. I will send you a brick and a half.

HOW IT FEELS TO LIVE FOR 12 HOURS IN SUBMARINE BOAT

HOW THE FULTON LOOKS ON AND UNDER WATER.

Test Was a Perfect Success and Boat Might Have Remained Below Twice as Long.

CAPTAIN F. T. CABLE, who with Captain J. J. Woodward and the officers and crew of the submarine torpedo boat Fulton passed twelve hours at the bottom of Narragansett Bay, gives to the BOSTON AMERICAN an interesting account of the adventure, describing how it feels to live under water for a half a day. His story is as follows:

By Captain F. T. Cable.
Eleven hours and a half we lived on the free air in the boat. We really did not have to breathe. The reserve supply, but I thought it well to test the apparatus to see that it was in working order. There is no more danger in one of these boats than there is in any other kind of boat. We sank to the bottom easily, and so we were not worried by the work of the previous day, and yet some of us played cards, and some read the papers of the day until about six o'clock, when we all went to sleep, some, who stood watch for two hours and then called the relief from that time. We could hear "cables" with propellers, and the sound of the boat, which was rebuffed, showing under water in submarine boat, really required by men who work with these types of boats, and there is no more to four in them, like any other kind of boat.

Test Was a Perfect Success and Boat Might Have Remained Below Twice as Long.
To live down and sleep. There is no one who the Fulton could not have stayed down twelve or more hours. The food and water, cooking material, and other things, were kept in the boat for a length of time.

By J. J. Woodward.
I am going to describe the feeling of being in a submarine boat. It is not a particularly pleasant feeling, but it is not a particularly unpleasant feeling either. It is a feeling of being in a small, dark, confined space, with no light, no air, and no sound. It is a feeling of being in a small, dark, confined space, with no light, no air, and no sound.

ENGINEER MORRELL.
There is no more to four in them, like any other kind of boat.

RHODES PRIZE TO LEXINGTON

SAYS HE CAN CURE BRIGHTS

Of the ten men who took the examination for the Rhodes scholarship, Francis W. Rhodes, of Lexington, a Harvard man, came out winner. He gets a scholarship at Oxford, England, for an advance of one year for three years. He must begin his residence at Oxford in October.

Fourteen, Says P. K.
The puzzle is too simple for me. I will send you a brick and a half.
